Index □ Volume 30, 1982

ARTICLES *(by title)*

Adaptive instructional strategies for teaching rules in mathematics, Steven M. Ross and Ernest A. Rakow, 30:2 67–74

CLTV: Collaborative learning television, Kenneth A. Bruffee, 30:1 26–40

Effects of mental imagery and oral and print stimuli on prose learning of intermediate grade children, John H. Maher, Jr. and Howard Sullivan, 30:3 178–183

Effects of text illustrations: A review of research, W. Howard Levie and Richard Lentz, 30:4 195–232

Epistemological and methodological bases of naturalistic inquiry, Egon G. Guba and Yvonna S. Lincoln, 30:4 233–252

From scare tactics to reasoned decisions: A decade of drug education films, Margaret A. Sheppard and Michael S. Goodstadt, 30:2 91–96

The interaction of learner aptitudes with instructional treatment in quadratic inequalities, Gary J. Anglin, Thomas M. Schwen, and John B. Anglin, 30:3 131–140

Networking vs. rote learning strategies in concept acquisition, James Canelos, William Taylor, and James Altschuld, 30:3 141–149

Picture content and preschoolers' learning from sentences, Michael Pressley, Susan Pigott, and Susan L. Bryant, 30:3 151–161

Pictures, audio, and print: Symbolic representation and effect on learning, Gwen C. Nugent, 30:3 163–174

Toward integration: Education, instructional technology, and semiotics, Michael F. Cassidy, 30:2 75–89

Visualization in learning and instruction: A cognitive approach, William Winn, 30:1 3–25

INTERNATIONAL REVIEWS *(by title)*

Cultural differences in the perception of image and color in pictures, Rune Pettersson, 30:1 43–53

Information science and today's school, Iu A. Pervin. *Abstracted by* Stephen T. Kerr, 30:3 185

Innovation on command: Instructional development and educational technology in the Soviet Union, Stephen T. Kerr, 30:2 98–116

On creative textbook design, V. I. Ryvchin. *Abstracted by* Stephen T. Kerr, 30:4 253

Training of users of automated information systems: How and for what purposes? User Training Working Party. *Abstracted by* Tjeerd Plomp, 30:4 254

Wagner, Robert W., 30:4 257–259

RESEARCH ABSTRACTS (*by title*)

Antecedents of children's comprehension of the purpose of television advertising, Ronald J. Faber and others, 30:3 192
Children's learning from a television newscast, Dan Drew and Stephen Reese, 30:2 128
Computer-managed instruction in the Navy: III. Automated performance testing in the Radioman "A" school, Marc Hamovitch and Nick Van Matre, 30:1 62
Computer-managed instruction in the Navy: IV. The effects of test item format on learning and knowledge retention, Kathleen A. Lockhart and others, 30:1 62–63

Developmental and aging difference in visual information processing, Daniel W. Kee, 30:3 191

Distance to university students' use of course materials to complete mathematics exercises, Ian F. Svenson and others, 30:3 192

Effect of instruction using students' prior knowledge and conceptual change strategies on science learning. Part I: Development, application, and evaluation of instruction, Mariana G. Hewson, 30:2 126

The effect on pupil performance of using hand-held calculators on standardized mathematics achievement tests, Janice Lewis and H. D. Hoover, 30:2 127–128

Effects of calculator usage and task difficulty on state anxiety in solving statistical problems, Lawrence J. Fabrey and Dennis M. Roberts, 30:1 62

Effects of context, retrieval cues and sequencing on learning and retention of fact from film, George R. McMeen, 30:1 61

The effects of pictorial aids on inferentially produced interference in younger and older children's sentence learning, Diane L. Truman, 30:1 61–62

The effects of three kinds of feedback on math performance, Kathleen F. Andrus and Donald J. Freeman, 30:2 126

Exploring the microcomputer learning environment. Independent research and development project reports, Liza Loop and Paul Christensen, 30:1 63

Facilitating children's understanding of questions through pictures: Implications for social class language differences, Dominic F. Gullo, 30:3 190–191

Improving the achievement of college biology students through the use of diagnostic/prescriptive instruction, Russell H. Yeany and Wenda J. Adams, 30:2 125

The influence of styles, text content, sex, and grade level on first, second, and third grade children's preferences for artistic style, Inez L. Ramsey, 30:3 191

Interactive study lessons to complement ANOVA, Craig W. Johnson and Barbara S. Plake, 30:2 126–127

Models of strategy and strategy-shifting in spatial visualization performance. Technical report no. 17, Patrick C. Kyllonen and others, 30:3 191–192

Optimization of computerized drills: An instructional approach, Martin A. Siegel and Louis V. DiBello, 30:4 260

Preschool children use Apple II to test reading skills programs, Ann McCormick Piestrup, 30:1 63–64

PSI: What are the critical elements? P. K. Leppmann and T. F. Herrmann, 30:4 260

Psychoeducational assessment and decision making: A computer-simulated investigation (and) **Technical supplement for computer-simulated investigations of the psychoeducational assessment and decision making process,** James E. Ysseldyke and others, 30:2 125–126

Role of television models in children's career decision-making, Lonnie Jean Dunlap, 30:2 128

Telecourse survey results, Julie Aspinwell-Lamberts, 30:2 127

Use of cameras in early childhood classroom to enhance academic and self-concept growth, Becky New, 30:3 190

Using PLATO to teach problem solving, Esther R. Steinberg, 30:1 64
